RE: 2013 License Renewal for Systems Cleaners Operating in Montrose County

Systems Cleaner or Transporter:

Since 2009, Montrose County rules require licensing for businesses engaging in cleaning or removing waste from individual sewage disposal systems within unincorporated Montrose County. All such licenses **expire on December 31st** of each year. Renewal applications are now due for 2013 and **must be submitted before January 31, 2012, with fees.**

New applicants must complete a written test, in addition to completing required forms. Please contact this office for more information and to schedule testing.

Renewing applicants must submit completed application with required forms and fees. **After submission and approval of the application packet, a licensing inspection will be scheduled for each truck.** Inspections will be scheduled in order of submission.

License and Vehicle Registration Certificates will be issued after inspections are successfully completed. The Vehicle Registration Certificate must be carried in the vehicle.

Renewing operators should review their equipment, before inspection, to confirm presence and legibility of **required lettering**. In addition to business name and address, county-assigned truck numbers, a minimum of four inches high and in a contrasting color, must be clearly visible in three places on the tank, on both sides and the rear.

Finally, a reminder: these regulations also require that licensed operators submit to Montrose Health **quarterly reports** detailing daily activities. Reports should include your business name, date of service, location of the ISDS or industrial waste site serviced, volume pumped, amount of waste disposed, and location and method of disposal. Blank forms are available, or, you may use your own so long as it has all required information.

Please feel free to contact me at 970.252.5018 or via email at vstauffer@montrosecounty.net, if you have questions or concerns.

Sincerely,

Vera Jean Stauffer, MS
Environmental Health Specialist
